

Now Hiring: Shop Machinist – Hydraulic Cylinder Repair & Heavy Equipment Components

We are looking for a skilled Machinist to join our team specializing in hydraulic cylinder manufacturing and repair. If you enjoy precision work, mechanical problem solving, and seeing the results of your craftsmanship go back into service on real equipment, this is a great opportunity to build a long-term career in a stable, well-equipped clean shop.

This role is ideal for an experienced Red Seal Journeyman Machinist, 3rd Year Apprentice, or even a Millwright with strong machining experience who enjoys hands-on mechanical work and precision repairs.

What You'll Do

- Manufacture and repair hydraulic cylinders and components
 - Machine rods, barrels, pistons, and glands using manual equipment
 - Disassemble, inspect, and rebuild hydraulic cylinders
 - Diagnose wear, damage, and mechanical issues
 - Work from drawings, measurements, and specifications
 - Maintain quality standards and safe shop practices
-

What We're Looking For

- Red Seal Journeyman Machinist or 3rd Year Apprentice
 - Experience with manual lathes, mills, and general machining equipment
 - Millwright experience is highly valued – this work often overlaps with millwright skills such as disassembly, mechanical troubleshooting, and precision measurement
 - Experience with hydraulic cylinders, hydraulics, or heavy equipment components is a strong asset
 - Strong attention to detail and pride in quality workmanship
 - Ability to work independently and as part of a small, skilled team
-

Why Join Our Team

- Competitive hourly wages based on experience
 - Benefits and DPSP retirement plan
 - Stable Monday–Friday schedule – evenings and weekends at home
 - Overtime opportunities available
 - Work on hydraulic components used in heavy equipment, marine, and industrial applications
 - Clean, organized shop with well-maintained equipment
 - Supportive environment where skilled trades are respected
 - Opportunity to grow as we expand
 - Long-term, stable employment in a growing company
-

About the Work

Our shop focuses on hydraulics, hydraulic cylinder repair and manufacturing supporting equipment used across construction, marine, energy, and industrial sectors. Every job is different, giving machinists the chance to diagnose problems, machine precision components, and rebuild equipment that goes back into the field.

Send your resume to:
jobs@eastcoasthydraulics.ca

Experienced machinists currently working in other shops are welcome to apply confidentially.
